Our comprehensive curriculum is designed to take you from a complete beginner to a job-ready full stack developer.

- Build Real World Projects
- Learn Frontend Development
- Master Backend APIs
- Database Management
- Authentication Systems
- Cloud Deployment
- Industry Best Practices
- Career Preparation

Course Description

Are you looking to break into the tech industry as a web developer? This course is the most comprehensive, yet straight-forward guide for the entire web development lifecycle. Whether you have never programmed before, already know basic syntax, or want to learn about the advanced features of modern full stack development, this course is for you!

We will start from the very basics of HTML, CSS, and JavaScript. We will then move on to advanced topics like React, Node.js, Express, MongoDB, and deployment. By the end of this course, you will have built several real-world projects and have a portfolio to show potential employers.
